**Subject:** Roadway Design Guidelines Revision - Vertical Clearance to Structures  
**Sent on Behalf of Mary Viparina, Assistant State Engineer, Roadway Engineering Group**

Section 206.4 of the 2007 Roadway Design Guidelines (RDG) has been revised to avoid duplication of structure vertical clearance requirements. The Bridge Design Guidelines, Section 2 will be the sole reference source and will be referenced in the RDG. There have been some revisions and updates to the Bridge Design Guidelines and designers should review the current clearance requirements to insure compliance. The updated material can be reviewed at the following Roadway and Bridge websites:

<http://www.azdot.gov/Highways/Rdwyeng/RoadwayDesign/ManualsGuidelines/PDF/RoadwayDesignGuidelines.pdf> See Section 206.4 

<http://www.azdot.gov/Highways/bridge/Guidelines/DesignGuidelines/PDF/Section02-GeneralDesignAndLocationFeatures.pdf> See pages 2-7& 8. 

Please distribute this e-mail to all design personnel in your respective Groups, Sections and Districts including consultants. You can direct any questions regarding this material to Chris Cooper or Terry Otterness. Thank you for your attention to this updated material.
